

The *Report Card Creator* is located at www.ncca.ie/primaryreporting. There are three simple steps to follow to customise the front cover of the *6th Class Report Card* (standard format) for your school. This user guide takes you through each of the steps. *The 6th Class Report Card* is part of the Education Passport materials at www.ncca.ie/transfer.

For illustration purposes the user guide uses a fictitious primary school to create a pupil report card. This school is “St. Brendan’s N.S.” and it is a mainstream English language medium school. The user guide will demonstrate how the Report Card Creator was used by “St. Brendan’s N.S.” to create the *6th Class Report Card* shown on pages 7 and 8.

STEP 1: SELECT THE REPORT CARD OPTION

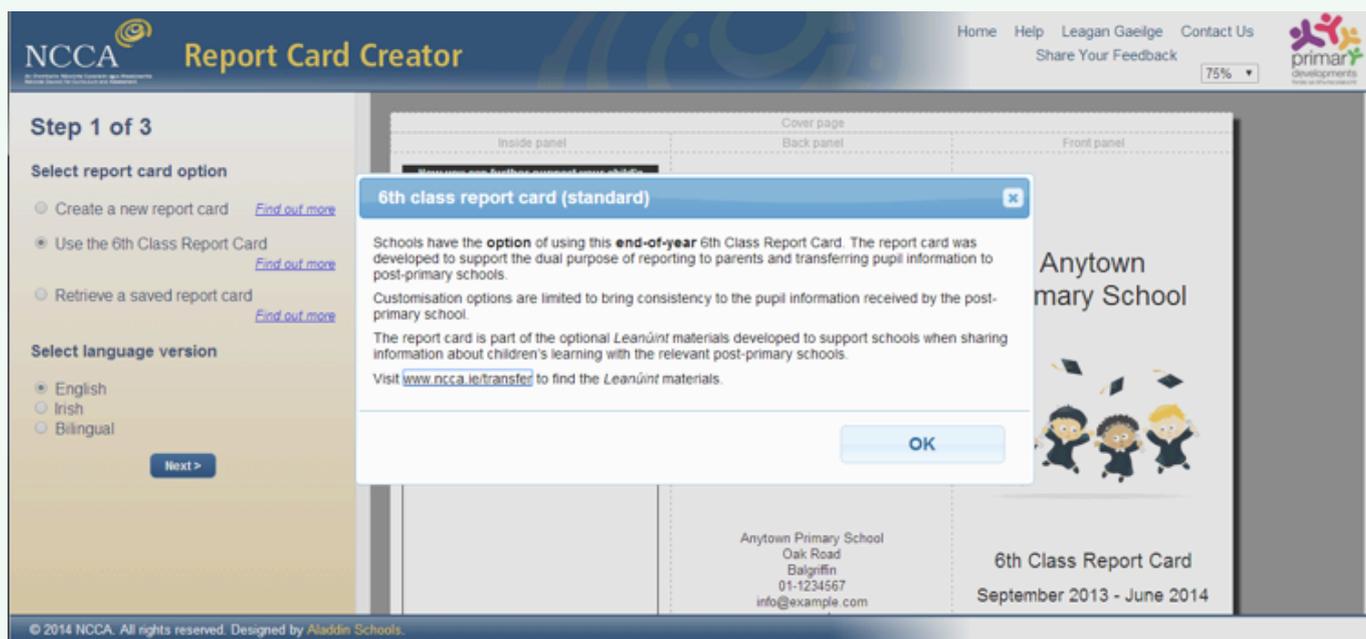

In step 1, you are given the options to **create** a new report card, to **use** the end-of-year 6th Class Report Card or to **retrieve** a saved report card using a unique code.

Please see the section *Download your customised 6th Class Report Card* in this guide for more information about the unique code and how to use it.

USE THE 6TH CLASS REPORT CARD

Select *Use the 6th Class Report Card*, and click the *Find out more* option to view more information on this report card, as below.

Screenshot 1: Select *Use the 6th Class Report Card*.

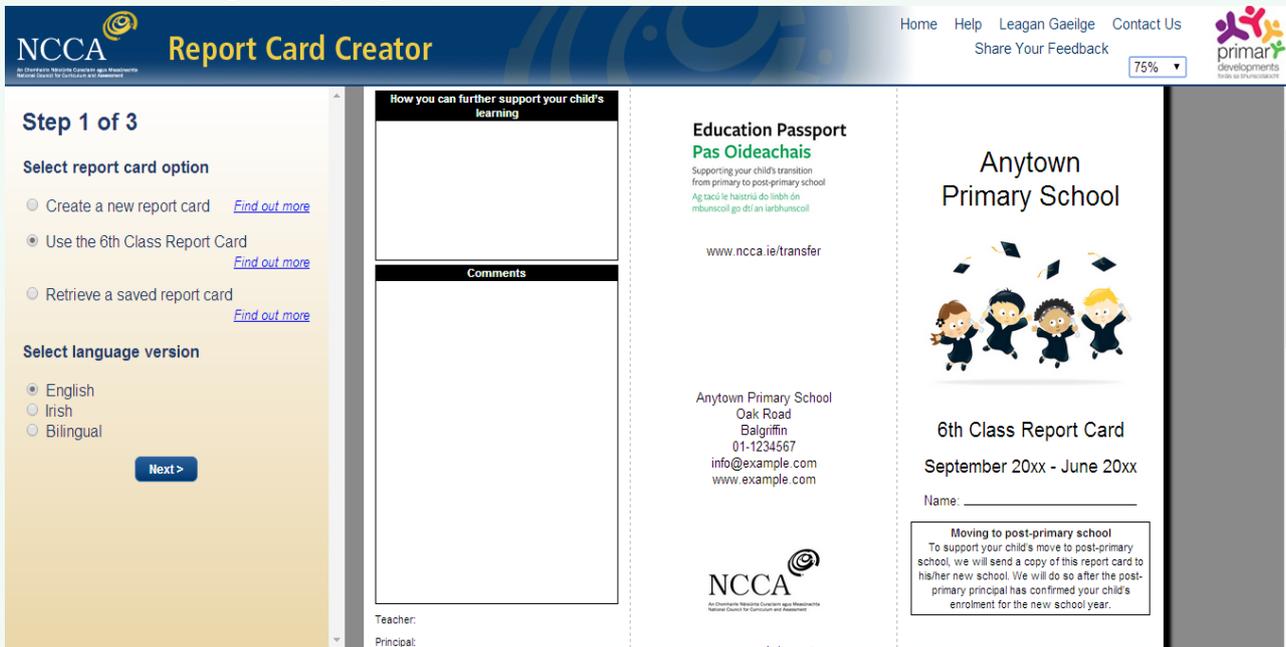

You have the option of creating a report card in an English, Irish or bilingual language version. Click on your preferred choice.

The preview of the report card on the right hand side of the screen will be immediately updated to reflect your selections. Occasionally your internet browser may not show the preview completely accurately. For example, lines may be missing or details may 'fall off' the bottom of the page. If this happens, do not worry, as the completed report card will appear correctly when downloaded.

We have selected the English language option in screenshot 2.

Screenshot 2: English language option selected.

The screenshot displays the NCCA Report Card Creator interface. On the left, under 'Step 1 of 3', the 'Select language version' section has 'English' selected. The 'Next >' button is visible. The main preview area shows a report card cover for 'Anytown Primary School' with the following details:

STEP 2: CUSTOMISE THE REPORT CARD COVER

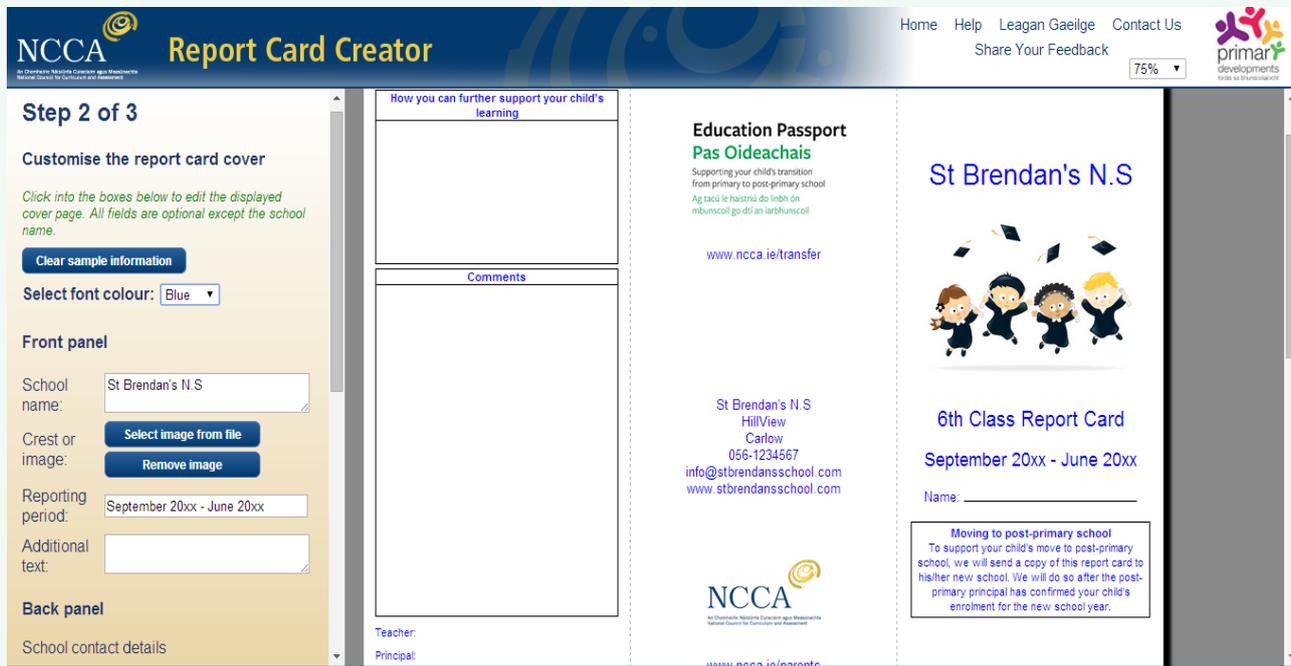

In step 2, you will customise the cover page of your report card.

You are presented with a range of options that allow you to customise the report card cover to reflect your school's details e.g. you can change the font colour to match your school colours, upload your own images, insert your school contact details. The options are located on the left of the screen. Click into the edit boxes to make changes to the displayed report card.

In screenshot 3 we have changed the font colour to blue, entered the school name, address, phone number, email address, website, and school motto.

Screenshot 3: Example of a customised report card cover.

The screenshot displays the 'Report Card Creator' interface. On the left, the 'Step 2 of 3' panel allows for customisation. The 'Front panel' includes fields for 'School name' (St Brendan's N.S.), 'Crest or image' (with 'Select image from file' and 'Remove image' buttons), 'Reporting period' (September 20xx - June 20xx), and 'Additional text'. The 'Back panel' is for 'School contact details'. The main preview area shows the report card cover with the following content:

Delete the text in the edit boxes if you wish to remove any items from the displayed report card. All changes are optional except for the school name. You will be required to insert your **school name** before you can move on to the next step.

Should you wish to fill in the report card by pen, there is also the option in this step to choose to enter blank lines to guide the writing of the child's name, your signature etc. Tick the box to insert the blank lines.

You can also replace the sample images in the displayed report card with your own. If you have removed the sample images and later wish to restore them, remove any other uploaded images by clicking on *Remove image* and then click on *Restore Sample Information* to get back the sample images.
